

LinkCAD – for CAD conversions

Translation and Viewing of Cad Databases

LinkCAD is the most robust and powerful CAD translator available and supports a wide range of file formats. It features a very intuitive user interface, which guides you through each step of the conversion process.

But LinkCAD is much more than a converter...

You can also use LinkCAD to display the loaded drawings with the built-in CAD viewer – you could measure distances on your design and highlight broken polylines. By using the viewer, it's also easy to toggle complex fills on and off – giving you the power to see behind the CAD.

Use several of the powerful tools to merge overlapping polygons, join adjacent wires, auto-detect holes and perform many other operations.

Correct common design problems, such as open or self-intersecting polygons.

Merge overlapping polygons 

Convert shapes to polygon outlines 

Convert quasi-circles to circles 

Connect adjacent wire segments 

Auto-detect holes

Products Offered

- § Convert Data
- § Edit Data
- § View Data

Formats Include

- § GDSii
- § DXF -AutoCAD
- § Gerber
- § CIF
- § Postscript
- § BMP, GIF, TIFF etc
- § Zealand IE3D
- § LASI TLC
- § BDF
- § Compass

Selling Points

- § Flexible & Powerful
- § Low Cost Technology
- § Excellent Support

PHOTO
DATA

CAD Format Supported	Import	Export
GDS-II (Calma Stream Format) <i>the widely used layout file format</i>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
DXF <i>AutoCAD's drawing interchange format</i>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
CIF (Caltech Intermediate Format) <i>a layout format used mostly at universities</i>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Gerber RS-274X <i>the standard PCB file format</i> ★	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Adobe PostScript <i>for producing high-quality printouts</i>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Graphics Files <i>such as TIFF, PCX, BMP etc</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
GDS-TXT <i>our human readable/editable version of GDS-II</i> ★	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Simulator Formats <i>IE3D, Sonnet, Acis, SAT</i> ★	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
LASI TLC <i>a layout format used by the free LASI editor</i>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
COMPASS Layout Files <i>a layout format written by COMPASS Design Automation tools</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Binary Die Format (BDF) <i>Pattern generator format</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
ASCII delimited data <i>for your own applications</i>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Product Pricing

We offer a 50% discount to educational institutions on the prices listed below:

	<u>Single</u>	<u>Network</u>
LinkCAD Basic	£ 625	£ 1875
+ GERBER option	£ 175	£ 525
+ VIEW option	£ 200	£ 600
+ GDS-TXT option	£ 100	£ 300
+ Tools option	£ 200	£ 600
+ Edit option	£ 125	£ 375
+ Simulator	£ 200	£ 600
LinkCAD (Full)	£ 1500	£ 4500
	<i>Discounted price with all options</i>	

Delivery: LinkCAD is delivered exclusively by Internet.
Prices above are based on Windows operating system - please enquire for prices on Linux and Unix platforms. After you purchase LinkCAD, we send you a Registration Code or a Network License, which turns the 15-day trial version into a registered version.
